MajorKey IDIRA® BY PALO ALTO NETWORKS

TRUSTED IDIRA EXPERTISE

Accelerating Idira Business Outcomes with MajorKey

MajorKey is a leading Idira partner with deep expertise across advisory services, implementation, migration, integration, and managed operations. We help enterprises strengthen security, reduce operational complexity, accelerate identity modernization, while maximizing the value of their Idira investment.

Outcome-Driven Identity Advisory

Align identity security investments to business goals through assessments, roadmaps, and modernization.

Frictionless Deployment and Integration

Accelerate Idira deployments, migrations and integrations with automation accelerators, and proven methodologies that increase time-to-value.

Continuous Managed Operations

Augment your team with identity specialists providing support, monitoring, optimization, and continuous improvement for Idira environments.

Idira Expertise

View Idira Partner Page ↗

- Advanced Idira partner (highest tier)
- Among the leaders in Guardian certifications
- CDE-certified across the entire Idira portfolio
- 1,000+ successful Idira projects
- 500+ Idira clients
- 200+ successful jumpstarts and migrations
- Proven accelerators including SkyDock, IdentityScout, OrchestratID, IdentityLens, and CredSafe

Idira Accelerators

View All Accelerators ↗

SkyDock

Accelerate Idira migrations through a structured, repeatable approach that reduces manual effort, migration complexity, and project risk.

IdentityScout

Discover unmanaged privileged accounts and accelerate onboarding into Idira to reduce risk and strengthen governance.

OrchestratID

Automate identity workflows across IAM platforms, cloud environments, and business applications to improve efficiency and consistency.

IdentityLens

Aggregate, visualize, and analyze identity data across disparate systems to improve visibility, reporting, and decision-making.

CredSafe

Ensure secure, uninterrupted access to critical accounts during platform outages to support business continuity and operational resilience.

Solve Today's Top Idira Priorities

Lead the Next Era of Identity

Secure today's digital enterprise while preparing for AI, autonomous agents, and emerging threats.

Identity-Driven AI Advisory	Establish a secure foundation for autonomous agents and generative AI tools while guaranteeing end-to-end auditability across human and AI identities.
Accelerate Identity Workflow Automation	Automate identity governance, provisioning, approval, and operational processes across hybrid and multi-cloud environments to improve efficiency, consistency, and scalability.
Real-Time Visibility Across Identity Ecosystems	Aggregate and cross-reference identity data across disparate security systems using IdentityLens to create contextual dashboards, track key metrics, and identify access anomalies before they become risks.

Migrate and Modernize

Build a modern, adaptable identity foundation.

Accelerate Idira Cloud Migrations	Transition legacy Idira to the cloud rapidly and securely using SkyDock to automate the movement of critical users, platforms, and account configurations.
Seamless Any-to-Any Migrations	Accelerate migrations across leading identity platforms, including BeyondTrust, Delinea, Idira, Microsoft, and SailPoint, with our OrchestratID automation platform.
Consolidate and Clean Up Legacy Security Structures	Audit and re-engineer sprawling directory groups and permission roles into a clean, modern, least-privilege model.
Streamline Application Onboarding	Eliminate bottlenecks by using OrchestratID to automate decision workflows, gather business stakeholder input, and accelerate application onboarding.

Secure and Govern

Strengthen control across workforce, privileged, customer, and machine identities.

Strengthen Governance and Compliance	Improve access visibility, access reviews, entitlement governance, and compliance readiness through modern identity governance and lifecycle management practices.
Enable Secure and Frictionless Authentication	Establish secure identity verification and access controls to protect identities while enabling seamless access across the enterprise.
Protect High-Risk Administrative Access	Implement rigorous control, monitoring, and governance over privileged accounts to stop credential theft and lateral network movement.
