

# IdentityLens

Gain real-time visibility and actionable insights across your identity ecosystem — all in one platform.

IdentityLens is a powerful reporting and analytics platform purpose-built for cybersecurity and identity programs. It seamlessly aggregates data from key systems to deliver real-time dashboards, customized, audit-ready reports, and automated insights.

## How it Works

IdentityLens connects to your organization's identity, infrastructure, and ticketing platforms via prebuilt and configurable connectors. Once connected, IdentityLens pulls data on a scheduled basis and normalizes it for reporting and analysis. Users can configure dashboards and reports to focus on the metrics that matter most to their roles.

## Core Benefits of IdentityLens

<b>Custom Dashboards &amp; Visualizations</b>	Interactive, widget-based dashboards let users tailor metrics and views to highlight trends, compliance status, and risk indicators.
<b>Time Series &amp; Trend Analysis</b>	Powerful temporal analytics uncover trends in behavior, compliance, or access activity to support strategic decisions.
<b>Automated, Scheduled Reporting</b>	Create and dispatch custom reports at defined intervals, ensuring stakeholders always have the latest insights in common file formats like CSV, Excel, and PDF.
<b>Real-Time, Unified View Across Identity Systems</b>	Integrates with leading cybersecurity and identity platforms and any API-enabled service to deliver consolidated, real-time security snapshots.
<b>Role-Based Access Control</b>	Granular permissions ensure users only see and interact with data relevant to their role, enhancing security and usability.
<b>Automated Compliance Tracking</b>	Surfaces privileged and unmanaged accounts through automation, streamlining audits and helping enforce PAM and IGA policies.
<b>Embedded Automation with OrchestratID</b>	Integrates with OrchestratID to trigger automated workflows like onboarding/offboarding accounts or provisioning VMs directly from reports, closing the loop between insight and execution.
