MajorKey

Identity Governance & Administration Services

Achieving Regulatory Compliance and Least Priveleged Access

Applying more than 25 years of experience, we help our clients successfully implement 'purpose-built' Identity Governance solutions to meet your regulatory requirements, across all industries and complex business processes.

No matter where you are in your identity journey, our advisors can help you establish a successful program through expert analysis of your environment, goals, and integration initiatives.

> Comply with SOX, HIPAA, PCI, NYDFS, GLBA and other Regulations
>
> Meet ISO27001 and NIST CSF2.0 Security Controls

How we help our clients

- Governance-driven Identity Lifecycle Management to support complex Joiner/Mover/Leaver processes
- ITSM Integrated unified 'Exception-based' Access Request experience
- Risk & Event based Campaigns for User-Manager, Application, Role and Service owner account Access Reviews
- Delegated Administration with Sponsorship, Ownership and Succession Management for your Entitlements
- Complex Authorization policies with Coarse & Fine-grained policy management
- Separation of Duties Management and Role Remediation
- Improved Risk-based Governance via Identity Analytics and Insights (Machine Learning & AI)
- Enhance Role Engineering through use of Analytics and Insights
- Role Governance and Management Programs
- Preventative, Corrective and Continuous Detective Controls for your IGA program
- Identity Threat Detection and Remediation

Rescue services for failed IGA implementationstions

IGA program assessment and modernization
