

Extend identity-focused governance to cloud infrastructure.

Govern and manage multi-cloud infrastructure with a single, identity-driven approach.

MajorKey provides advisory, integration, and managed services around SailPoint CIEM delivered through its highly skilled teams of onshore, nearshore, and offshore resources.

SailPoint CIEM extends identity security to cloud infrastructure so that enterprises can govern access in the same way they use SailPoint identity security to manage access to other applications and data.

Implement an identity-focused approach to cloud entitlements and certifications.

- ✓ Discover and visualize effective access across all cloud entitlements.
- ✓ Automate cloud account provisioning and certify access.
- ✓ Enable self-service requests for access.
- ✓ Govern inappropriate, unauthorized, or unused access.
- ✓ Leverage usage data to create or adjust policies based on data-driven needs.
- ✓ Model and define consistent access policies based on roles and activities across multi-cloud environments.
